# Differential pressure transmitter with humidity/temperature option

## testo 6381

Measurement of differential pressure, flow velocity, volume flow; optional: humidity and temperature

Automatic zero-point adjustment guarantees high, temperature-independent accuracy and long-term stability

Low measurement range up to 10 Pa ensures very high precision at lowest pressures

Ethernet, relay and analog outputs allow optimum integration into individual automation systems

The P2A software for parameterization, adjustment and analysis saves time and costs in commissioning and maintenance

Configurable alarm management with adjustable response delay and alarm acknowledgement

hPa

%RH

°C

The differential pressure transmitter testo 6381 was developed specially for monitoring differential pressure in the measuring range from 10 Pa to 1000 hPa. In cleanroom technology, the maintenance of positive pressure prevents the entry of contaminated air. In addition to this, the flow velocity or the volume flow can be calculated from the measurement of the differential pressure in a Pitot tube. Thanks to an optional probe from the probe series 6610, the additional recording of humidity and temperature with one instrument is also possible.

The testo 6381 is particularly outstanding thanks to the automatic zero-point adjustment which ensures high accuracy and long-term stability.

The integrated self-monitoring and early warning function also guarantees the operator high system availability.

\* The determination of measurement uncertainty takes place according to GUM (Guide to the Expression of Uncertainty in Measurement):

For the determination of measurement uncertainty, the accuracy of the measuring instrument (hysteresis, linearity, reproducibility), the uncertainty contribution of the test site as well as the uncertainty of the adjustment site (works calibration) are taken into account. For this purpose, the value of k=2 of the extension factor, which is usual in measurement technology is used as a basis, which corresponds to a trust level of 95%.
