

## Differential pressure measuring instrument

testo 510 - Pocket-sized differential pressure measurement

Differential pressure measurement 0 to 100 hPa

Flow velocity measurement possible with Pitot tube

Temperature and air density compensation

Display illumination

10 selectable units

Including hoses

Illustration 1

testo 510 measures differential pressure in the range from 0 to 100 hPa. The differential pressure measurement is temperature-compensated for accurate measurement values. The measurement values can be displayed in Pascal over the entire measurement range. Magnets at the rear permit free-hand work. The backlit display allows the

measurement values to be easily read out, even in unfavourable light conditions. The testo 510, in combination with a Pitot tube, measures air flow velocity. For accurate measurement values, the air density can be compensated. testo 510 is very handy, small and easy to operate.

## **Technical data / Accessories**

Sensor type	Differential pressure sensor
Measuring range	0 to 100 hPa
Accuracy ±1 digit	±0.03 hPa (0 to 0.30 hPa) ±0.05 hPa (0.31 to 1.00 hPa) ±(0.1 hPa + 1.5 % of mv) (1.01 to 100 hPa)
Resolution	0.01 hPa

General technical data		
500 mbar		
1.5 bar		
0 to +50 °C		
-40 to +70 °C		
hPa, mbar, Pa, mmH2O, inH2O, inHg, mmHg, psi, m/s, fpm		
IP40		
2 AAA micro batteries		
50 h (average, without display illumination)		
0.5 s		
119 x 46 x 25 mm		
90 g (with batteries and protective cap)		
2 years		

Accessories	Part no.
Accessories for measuring instrument	
Connection hose, silicone, 2 m long, max. load 700 hPa (mbar)	0554 0448
Belt holder	0516 4007
ISO calibration certificate pressure; differential pressure; 3 points distributed over meas. range	0520 0095
ISO calibration certificate pressure; differential pressure; 5 points distributed over meas. range	0520 0005
